The Client-Centered Law Firm Jun 24 2022 The legal industry has long been risk averse, but when it comes to adapting to the experience-driven world created by companies like Netflix, Uber, and Airbnb, adherence to the old status quo could be the death knell for today's law firms. In The Client-Centered Law Firm, Clio cofounder Jack Newton

offers a clear-eyed and timely look at how providing a client-centered experience and running an efficient, profitable law firm aren't opposing ideas. With this approach, they drive each other. Covering the what, why, and how of running a client-centered practice, with examples from law firms leading this revolution as well as practical strategies for implementation, The Client-Centered Law Firm is a rallying call to unlock the enormous latent demand in the legal market by providing client-centered experiences, improving internal processes, and raising the bottom line.

Academic Library Makerspaces: A Practical Guide to Planning, Collaborating, and Supporting Campus Innovation Jul 14 2021 Moving beyond simplistic equipment lists, this book provides contextual and practical information to help academic library personnel learn how to plan, collaborate, and sustain relevant makerspaces positioned within the broader ecology of campus innovation. The

makerspace movement within academic libraries has largely focused on providing space and equipment for making. Academic libraries, however, have a unique opportunity to push beyond the 3D printer to create makerspaces that complement the broader ecology of innovation happening on campus. Intended for academic library personnel, this book is for those seeking guidance on how to establish a makerspace that is more than an equipment room. Katy Mathuews and Daniel Harper provide important context for the maker movement, a review of the process of making, and an overview of the various types of makerspaces, including the hub-and-spoke model, the centralized model, and the mobile makerspace. Additionally, the book provides practical steps to consider, including situating the academic library makerspace within the campus environment, creating valuable collaborations on campus, finding innovative ways to support the entire making process, programming, curriculum planning, and sustaining daily operations such as staffing, funding, and public service. Understand how making fits into the campus ecology of innovation and how academic libraries are naturally suited to support the maker movement Understand the history of the maker movement, makerspace typologies, and the making process Learn how to build sustainable relationships with campus and

community collaborators Learn what to consider when establishing a library makerspace, including planning, staffing, and funding Understand how traditional library services can complement the makerspace and making process, including programming and instruction

Advocating a strategic approach, this book shows how to form a plan, secure funding and support, and create effective programs for adults, children, and youth who are experiencing homelessness. You'll find guidance for creating partnerships, training staff, and advocating. Taking a holistic approach that will help you to better understand the experience of homelessness within the context of your library community, this book offers new strategies and tools for addressing the challenge of

meeting the needs of the entire community, including those who are unstably housed. With basic facts, statistics, and conversations about homelessness, the author makes a case for why libraries should provide support, explains exactly which needs they may be able (or unable) to meet, and shows how you can do that as a natural part of the library services you already provide. Topics discussed include trauma-informed care, harm reduction, and mental and physical health challenges; brief stories and concrete examples illustrate the principles and guidelines discussed. Citing innovative services such as Dallas Public Library's "coffee and conversation" program and San Francisco Public Library's social worker program, the book offers both food for thought and tools for action as public librarians strive to understand and meet the needs of a population that has traditionally been stereotyped and excluded. * Discusses specific short-term and long-term actions that libraries can take to better address the needs of community members who are experiencing homelessness * Outlines steps libraries can take to balance the needs of all library users * Shows how to identify and work with potential partners * Describes new ways libraries can and are addressing common barriers to library services for those experiencing homelessness

This book maps all types of games—board, roleplaying, digital, and virtual reality—providing all the information needed

to understand and appropriately recommend games to library users. Organized by game type, hundreds of descriptions offer not only bibliographic information (title, publication date, series, and format/platform), but genre classifications, target age ranges for players, notes on gameplay and user behavior type, and short descriptions of the game's basic premise and appeals.

Archival Information Oct 05 2020 From original manuscripts and letters to sound recordings and birth certificates, archival information plays an increasingly important role in modern research. Libraries and the Internet have made finding information on a wide range of topics faster and easier, but not all information—particularly from primary sources—is available via local library branches or online resources. Using archival information presents its own challenges. Materials are often located in many different places: public or academic libraries, government agencies, historical societies, or museums. They are usually kept in secured areas where the public is restricted from browsing. This definitive guide shows novice and experienced researchers how to find archival information. It provides tips on how to use archival materials effectively and efficiently. Topics covered include government archives, science and technology collections, military archives, genealogical records, business and corporate

archives, performing arts archives, and sports collections. Also provided is an overview of the world of archives, including archival terminology, how to contact archives, and archival etiquette. Whether searching for a noted author's original manuscripts, trying to locate presidential papers, or tracking down a repository of oral histories, Archival Information is an indispensable reference.

The Yale Law School Guide to Research in American Legal History Feb 18 2022 The study of

legal history has a broad application that extends well beyond the interests of legal historians. An attorney arguing a case today may need to cite cases that are decades or even centuries old, and historians studying political or cultural history often encounter legal issues that affect their main subjects. Both groups need to understand the laws and legal practices of past eras. This essential reference is intended for the many nonspecialists who need to enter this arcane and often tricky area of research.

Library Services for Online Patrons: A Manual for Facilitating Access, Learning, and Engagement May 31 2020 This practical and holistic approach to offering library resources and services to online patrons addresses multiple areas of service to online patrons, including reference, instruction, access, and marketing. Academic libraries are wonderful resources for university students and faculty on campus, and public libraries thrive on providing targeted in-person services such as storytime, makerspaces, and adult programming. It can be easy, however, to forget about the large population of students, faculty, and community members who access library resources and use library services remotely. Library Services for Online Patrons reaches out to patrons who are not—or not always—located on campus or who seldom—if ever—visit libraries' physical facilities and who may not be aware of or able to equitably use library services. The authors focus on ways to organize library resources using principles of design and to cater library services to the specific needs of online students, faculty, and community

members. They also address how to effectively target marketing to the online population and how to collaborate with campus and community stakeholders who work directly with them. Provides novel services and resources that will save librarians already serving online patrons time and energy Offers a broad, practical perspective to help novice librarians make initial connections with online learners Emphasizes the importance of identifying other institutional players in online education in order to effectively implement and market improvements Enhances understanding of the importance of universal design and how to assess possibilities for improvement in online services
