Advances in Epithelial Ovarian Cancer: Model Systems, Microenvironmental Influences, Therapy, and Origins Feb 05 2021 This eBook provides a compendium of the current state-of-the-art in research tools for, and understanding of, the critical research areas in epithelial ovarian cancer (EOC) with a strong emphasis on (HG-SOC). Research areas covered include therapy response and development, microenvironmental influences and the etiology and progression of EOC. Ten articles detail established and novel in vivo and in vitro model systems. These include primary and immortalized cell culture in 2D and 3D as well as genetically engineered, transgenic, spontaneous, syngeneic, classical xenograft and patient derived xenograft mouse models. The generation of genetically engineered mouse models of HG-SOC has been a major dilemma as models with the oncogenic aberrations common in the human malignancy do not accurately recapitulate HG-SOC. Conversely, commonly used HG-SOC cell lines

have been found to not harbor the expected genetic changes. These issues as well as the rapid acceptance of patient derived xenograft models are reviewed. Five articles discuss different aspects of the tumor microenvironment including its role in therapy resistance, disease progression and metastasis. Mutation of BRCA1/2 continues to be the best defined risk factor for HG-SOC. Three articles discuss BRCA-loss in the context of disease development, targeted therapies and changes in preventative measures proposed for mutation carriers in light of the recent advances in knowledge regarding the origins of this malignancy. An image of HG-SOC with reduced BRCA1 expression is featured on the cover (image by VM Howell). A major clinical issue for patients with HG-SOC is the development of therapy resistance. Five articles focus on therapy resistance and different ways to overcome resistance. Overall, this eBook is an outstanding resource to aid researchers design their programs of research and determine the most appropriate and up-to-date EOC model systems to address their research questions.

HC 605 - The FCO's Performance and Finances in 2013-14 Jun 21 2022 The cuts imposed on the FCO since 2010 have been severe and have gone beyond just trimming fat: capacity now appears

to be being damaged. If further cuts are imposed, the UK's diplomatic imprint and influence would probably reduce, and the Government would need to roll back some of its foreign policy objectives. The FCO's budget is a tiny element of Government expenditure, but the FCO makes disproportionate contribution to policy making at the highest level, including decisions on whether to commit to military action. The next Government needs to protect future FCO budgets under the next Spending Review.

Managing the global health response to epidemics Apr 07 2021 Recent epidemics have prompted large-scale international interventions, aimed at mitigating the spread of disease in a globalized world. During a crisis, however, global health actions - including planning and organizing, communicating about risk, and cost-benefit

evaluations - aren't usually part of a single, integrated global response. Arguing that an uncoordinated approach can be challenged by local conditions and expectations, generating a wide range of resistance and difficulties, this volume provides important insights for future outbreak management and global health governance. Drawing on experiences with A(H1N1) and Ebola virus disease, the book is divided into three parts looking at how responses to global health crises have developed, lessons learned from particular pandemics and the ethical implications of our management of them. Individual chapters focus on, among other issues, financing, cost-benefit analysis, matrix management, risk communication and organizational strategies. Taking a social science perspective, this valuable book outlines the current state of global health emergency responses and explores ways in which they can be improved. It is a useful read for academics and practitioners interested in global health, the sociology of health and illness, health economics and emergency management.

International GAAP 2015 Jun 09 2021 IFRSs, the standards set by the International Accounting Standards Board (IASB), are complex and sometimes obscure. Understanding their implications and applying them appropriately requires something special; and that is why International GAAP® 2015 is the essential tool for anyone applying, auditing, interpreting, regulating, studying and teaching international financial reporting. It provides expert interpretation and practical guidance for busy professionals, and includes, in every chapter, detailed analysis of how complex financial reporting problems can be resolved appropriately and effectively. The International Financial Reporting Group of Ernst & Young includes financial reporting specialists from throughout the world. Complex

technical accounting issues are explained clearly in a practical working context that enables immediate understanding of the point at issue. International GAAP® 2015 is the only globally focused work on IFRSs. It is not constrained by any individual country's legislation or financial reporting regulations, and it ensures an international consistency of approach unavailable elsewhere. It shows how difficult practical issues should be approached in the complex, global world of international financial reporting, where IFRSs have become the accepted financial reporting system in more than 100 countries. This integrated approach provides a unique level of authoritative material for anyone involved in preparing, interpreting or auditing company accounts, for regulators, academic researchers and for all students of accountancy. All aspects of the detailed requirements of IFRS are dealt with on a topic-by-topic basis. Each chapter of International GAAP® 2015 deals with a key area of IFRS and has a common structure for ease of use: An introduction to the background issues An explanation of relevant principles A clear exposition of the requirements of IFRS A discussion of the implications in practice and possible alternative solutions available Worked examples Extracts from real company accounts A

Civil-Military Relations in Post-Deng China Apr 26 2020 This book demonstrates that civil-military relations have evolved beyond symbiosis to quasi-institutionalization in post-Deng Xiaoping China. As the People's Liberation Army (PLA) is a Leninist party-army, it is commonly assumed that the relationship between the Chinese Communist Party (CCP) and the PLA is symbiotic and institutional boundaries based on a clear functional division of labor are absent

between the two. This symbiosis suggests that the primary role of the PLA is in China's domestic politics; it is to participate in intra-CCP leadership power struggle and in defending the CCP regime against popular rebellions from within Chinese society. By analyzing major changes in the functions of the PLA political commissar system, the extent of the PLA involvement in the power struggle of the CCP leadership, and the circulation of elites across civil-military institutional boundaries, this book offers a new theoretical explanation of civil-military relations in China. It also discusses the implications of the findings for China's domestic politics and foreign policy.

China's International Roles Jun 28 2020 This collection examines changes in China's international role over the past century. Tracing the links between domestic and external expectations in the PRC's role conception and preferred engagement patterns in world politics, the work provides a systematic account of changes in China's role and the mechanisms of role taking. Individual chapters address the impact of China's history and identity on its bilateral role taking patterns with the United States, Japan, Africa, the Europe Union, and Socialist States as well as China's role in international institutions, the G-20, and East Asia's Financial Order. Each of the empirical chapters is written to a common template exploring the role of historical self-identification, altercasting and domestic role contestation in shaping the PRC's role. The volume provides an analytically coherent framework evaluating whether cooperation or conflict in China's international engagement is likely to increase, and if so, the extent to which this will follow from incompatible domestic demands and external expectations. By combining a theoretical framework with strong comparative case studies, this volume

contributes to the ongoing debate on China's rise and integration into the international society and provides sound conclusions about the prospects for a transition of China's purpose in world politics.

Performativity in Education Aug 11 2021 A powerful policy of performativity now exists, in which the pupils, teachers and schools are held responsible for 'performance' and at the same time these systems are used for stratification of these groups. These performative policies are underpinned by a major global policy to improve economic status and social well being; a market based approach

that encourages performance-based activity. Performativity is a technology, a culture and mode of regulation that employs judgements and comparisons and displays the performances of individual subjects or organisations to serve as measures of productivity. Policy makers believe it raises standards in schools and achievement levels of the mass of the population. In setting targets for Regional/Local/District Education Authorities and schools, governments hope to develop a highly skilled workforce that can compete in what it sees as a new global industry - the knowledge economy. It is argued that a higher skills base and higher levels of excellence in knowledge acquisition, and the best use of that knowledge, the higher the economic return will be for national States. This international collection focuses on the experience of students, from the age of four to adulthood, across seven different countries, Australia, Denmark, England, Germany, Ireland, Sweden and the USA. Young children and students performative identities are constructed as they become enculturated, 'self-designations and self-attributions brought into play during the course of interaction'. These are imputed identities, which a performative learner takes on as they experience everyday discourse practice and

engage in social acclimatisation. Researching learners gives an insight into the power and influence of teaching and learning practices – discourses – have on the practices of the self. They cannot avoid the discourses but they seek to find ways to manage them, and occasionally resist them, in order to maintain social relations and social cohesion within their social context. This global collection of articles brings out the ways in which performativity affects students, the tensions created and some strategies to manage performative contexts. It will therefore be of interest to all sectors of education and to readers from across the globe.

EBOOK: Perioperative Practice Case Book Feb 17 2022 This case book is the ideal text for Operating Department Practitioners (ODPs), as well as student ODPs and nurses preparing to work in perioperative care. Delivering individualised, holistic and evidence-based care can be challenging in the perioperative setting, requiring the practitioner to apply specialist clinical knowledge to each individual patient. This text presents 20 interactive case studies that will support the reader in assimilating a wide range of professional knowledge in order to develop a comprehensive plan of care for patients they encounter. The practical cases:

- Demonstrate how care will vary depending on the patient's physiological assessment and their personal, social, cultural and emotional needs*
- Will consolidate the reader's learning around pathophysiology, pharmacology, assessment skills and clinical skills*
- Include common clinical procedures as well as those that are more complex and require a deeper analysis of the evidence in order to improve patient care.*
- Use "Stop and Think" boxes to encourage readers to reflect on key points within the case study, in order to develop their own knowledge and assist in their CPD This text*

will support all learners, at both pre- and post-registration level as they develop their knowledge of perioperative care. Its goal is to help the practitioner deliver excellent and confident care in perioperative practice and in other healthcare settings. "Although clearly targeted at the student Operating Department Practitioner, Abbott and Wordsworth have produced a learning resource that any learner in the perioperative environment will find both informative and a useful learning aid. The editors have set out the twenty patient case studies in a sequence that allows the student to work through them as their course and competence progresses, although students can dip into the case studies in any order that supports their current clinical placement. The section introducing perioperative care is essential reading for any perioperative practitioner, with an up-to-date introduction to the latest concepts of teamwork and human factors in patient safety. Coupled with the patient-centred focus of the case studies this provides any reader with an understanding of the changing approach to patient care in the perioperative environment." Bill Kilvington, President, College of Operating Department Practitioners, UK "I have read this book several times and found that the chapter contents are excellent.

This book will be useful for ODPs and theatre nurses, it will enhance their knowledge and skills and may also enhance their abilities to work in operating departments and care well for patients. The book covers preoperative care, intraoperative care and postoperative care which is essential for all practitioners working in operating departments. The content of this book is very informative and will be of great use to both students and qualified practitioners. I find it very impressive and I envisage it to be very useful to all theatre practitioners!" Paul Wicker, formerly Head of Perioperative Studies, Edge Hill University, UK and Visiting Professor, Nanjing University, China.

Library Technology and Digital Resources Jul
10 2021 In the last decade library collections
have rapidly evolved from a predominance of
print books and journals to an ever growing
mix of digital and print resources. Library
patrons are predominately served by support
staff that is expected to know how to help
patrons select and use digital resources. Yet
most library support staff (LSS) has not had
training to become proficient in finding,
using, and instructing others in the abundance
of the digital resources of websites,
databases, e-texts, digital libraries and
their related technologies. *Library Technology
and Digital Resources: An Introduction for
Support Staff* is both a text for professors
who teach in library support staff programs
and an introductory reference manual for
support staff who work in libraries. This book

will guide the LSS to be able to: Distinguish key features and enhancements found among vendors and providers of digital libraries, digital collections, databases, and e-texts; Plan, budget, fund and write grants for digital resources; Understand the complexity and options of licensing and usage agreements for digital resources; Know copyright permissions and acceptable use guidelines for digital resources. Understand the basic technologies that support library digital resources including network structures, software applications, and protocols; Distinguish between directories and search engines as they relate to digital resources as well as be able to employ advance search skills effectively; Explore the resources of global, national, and state digital libraries and their collections; Use government databases and other digitized systems and information sources; Find exemplary digital resources through other agencies such as museums, university collections and other sources that librarians can share with patrons. Create local digital resources of primary and historical materials and artifacts with metadata and cataloging for searchable access. Interpret meaning from library digital resources using visual literacy skills. Promote library digital resources through a

Transfer Pricing Aspects of Intra-Group Financing Mar 26 2020 For corporate managers, maximization of the profits and the market value of the firm is a prime objective. The logical working out of this principle in multinational enterprises has led to an intense focus on transfer pricing between related companies, principally on account of the very attractive tax advantages made possible. Inevitably, numerous countries have established transfer pricing legislation designed to combat the distortions and manipulations that are inherent in such transactions. This important book, one of the first in-depth analysis of the current worldwide working of transfer pricing in intra-group financing and its resonance in law, presents the relevant issues related to loans, financial guarantees, and cash pooling;

analyses an innovative possible approach to these issues; and describes new methodologies that can be implemented in practice in order to make intra-group financing more compliant with efficient corporate financing decisions and the generally accepted OECD arm's length principle. Comparing the tax measures implemented in the corporate tax law systems of forty countries, this study investigates such aspects of intra-group financing as the following: - corporate finance theories, studies, and surveys regarding financing decisions; - application of the arm's length principle to limit the deductibility of interest expenses; - impact of the OECD's Base Erosion and Profit Shifting (BEPS) project; - transfer pricing issues related to intra-group financing; - credit risk in corporate finance; - rationales utilized by credit rating agencies; and - the assessment of arm's length nature of intra-group financing. The author describes ways in which the application of the arm's length principle can be strengthened and how the related risk of distortion and manipulation can be minimized. The solutions and methodologies proposed are applicable to any business sector. Given that determination of the arm's length nature of transactions between related companies is one of the most difficult tasks currently faced by taxpayers

and tax administrations around the world, this thorough assessment and analysis will prove extraordinarily useful for in-house and advisory practitioners, corporate officers, academics, international organizations, and government officials charged with finding effective responses to the serious issues raised. In addition to its well-researched analysis, the book's comparative overview of how loans, financial guarantees, and cash pooling are currently addressed by OECD Member States and by their national courts is of great practical value in business decision making.

Hybrid Technologies for Power Generation May 08 2021 Hybrid Technologies for Power Generation addresses the topics related to hybrid technologies by coupling conventional thermal engines with novel technologies, including fuel cells, batteries, thermal storage and electrolysis, and reporting on the most recent advances concerning transport and stationary applications. Potential operating schemes of hybrid power generation systems are covered, highlighting possible combinations of technology and guideline selection according to the energy demands of end-users. Going beyond state-of-the-art technological developments for processes, devices and

systems, this book discusses the environmental impact and existing hurdles of moving from a single device to new approaches for efficient energy generation, transfer, conversion, high-density storage and consumption. By describing the practical viability of novel devices coupled to conventional thermal devices, this book has a decisive impact in energy system research, supporting those in the energy research and engineering communities. Covers detailed thermodynamic requirements for multiple smart technologies included in hybrid systems (i.e., FC, electrolysers, supercapacitors, batteries, thermal storage, etc.) Features fundamental analysis and modeling to optimize the combination of smart technologies with traditional engines Details protocols for the analysis, operation and requirements of large-scale production

Environmental Subsidies to Consumers Jan 24 2020 A typical consumer underestimates the benefits of future energy savings and underinvests in energy efficiency, relative to a description of the socially optimal level of energy efficiency. To alleviate this energy-efficiency gap problem, various programs have been implemented. In recent years, many governments have started providing consumers with subsidies on the purchases of eco-friendly products such as hybrid cars and

energy efficient appliances. This book conducts a comprehensive analysis of the environmental subsidy programs conducted in Japan and examines their impacts on consumer product selection, consumer product use, and environmental outcome. The book also proposes recommendations for future environmental and industrial policies. The book's empirical findings will be of interest to those who are researching on and policymakers of environmental and industrial policies.
