Care Work May 31 2020 This insightful volume argues that care workers ?those looking after children, the elderly, and people with disabilities ?require security similar to any other group of workers. It provides a valuable overview and analysis of care work as a relevant social policy phenomenon in industrialized and developing countries around the world, while exploring pivotal questions such as how provisions for care are made, who is to benefit, and who is to pay.

Opportunistic Adaptation Aug 22 2019 Urban climate adaptation currently focusses mainly on hazards but often ignores opportunities which arise in both space and time. Opportunistic Adaptation provides

a rationalized approach to mainstream measures for climate adaptation into urban renewal cycles. Adaptation opportunities are identified by projecting the lifespans of urban assets into the future to obtain an operational urban adaptation agenda for the future. Upscaling of the adaptation process is done by synchronizing the end-of-lifecycle of a group of assets to develop adaptation clusters that comprise multiple dwellings, infrastructure as well as public spaces. An extensive catalogue of adaptation measures for different scale-levels ensures flexibility in the type of measures that can be integrated. Sequencing the adaptation measures over long periods of time provides insight and flexibility in the long-term protection standards that can be achieved. By applying a design-centered approach, the potentials of obtaining co-benefits in the urban landscape are maximized. Potentials of clustering of nature-based solutions are being considered which ensures to maximize the delivery of ecosystem services. This research aims to assess \the adaptation potential of Bangkok, based on a case study area (Lat Krabang) by mapping the adaptation opportunities and flood vulnerability. The resulting outputs will contribute to the development of a flexible and inclusive FRM strategy.

[Metrics of Subjective Well-Being: Limits and Improvements](#) Nov 29 2022 This volume analyses the quantification of the effect of factors measuring subjective well-being, and in particular on the metrics applied. With happiness studies flourishing over the last decades, both in number of publications as well as in their exposure, researchers working in this field are aware of potential weaknesses and pitfalls of these metrics. Contributors to this volume reflect on different factors influencing quantification, such as scale size, wording, language, biases, and cultural comparability in order to raise awareness on the tools and on their conditions of use.

The Collected Papers of Bertrand Russell Volume 29 May 12 2021 Détente or Destruction, 1955-57 continues publication of Routledge's multi-volume critical edition of Bertrand Russell's shorter writings. Between September 1955 and November 1957 Russell published some sixty-one articles, reviews, statements, contributions to books and letters to editors, over fifty of which are contained in this volume. The texts, several of them hitherto unpublished, reveal the deepening of Russell's commitment to the anti-nuclear struggle, upon which he embarked in the previous volume of Collected Papers (Man's Peril, 1954-55). Continuing with the theme of nuclear peril, this volume contains discussion of nuclear weapons, world peace, prospects for disarmament and British-Soviet friendship against the backdrop of the Cold War. One of the key papers in this volume is Russell's message to the inaugural conference of the Pugwash movement, which Russell was instrumental in launching and which became an influential, independent forum of East-West scientific cooperation and counsel on issues as an internationally agreed nuclear test-ban. In addition to the issues of war and peace, Russell, now in his eighties, continued to take an interest in a wide variety of themes. Russell not only addresses older controversies over nationalism and empire, religious belief and American civil liberties, he also confronts head-on the new and pressing matters of armed intervention in Hungary and Suez, and of the manufacture and testing of the British hydrogen bomb. This volume includes seven interviews ranging from East-West Relations after the Geneva conference to a Meeting with Russell.

[Working in Digital and Smart Organizations](#) Mar 22 2022 Contributing to recent debate on the emergence of digital and agile work, this book explores the implications for labour and employment relations within and beyond organizational boundaries. Taking a multidisciplinary approach to the key issues and challenges of digitalization, this collection covers topics such as the gig economy, crowdworking and Industry 4.0. Theory and analysis are combined as the authors examine the impact of digital and smart work on organization, HRM and labour law. With comprehensive empirical evidence for those

interested in understanding the more complex trajectories of today's transforming work relationships, this book will not only appeal to students and academics but also to policy-makers, trade unionists and employers' organizations.

Eriophyoid Mites: Progress and Prognoses Feb 18 2022 Fourteen informative papers dealing with their DNA, species interactions, adventiveness, host specificity, potential as bio-control agents of weeds, chemical control, behaviour, their role in fungal pathogen epidemiology, influence in forests and on ornamentals, collecting and mounting techniques and their interaction with crops are presented here. This is an extensive and valuable contribution to eriophyoid science and a must for present and future researchers in this field. National Policy Responses to Urban Challenges in Europe Oct 24 2019 This book presents a unique overview of urban policy conducted by national authorities in the fifteen 'old' member states of the EU. Focussing on recent changes in the development of the larger cities and changes in policymaking by national authorities with respect to urban development, the book is structured around 15 'country chapters', written by national experts in the field of urban development. The book provides an up-to-date source of information, and will be of importance to anyone involved in the role and development of European cities as well as the formulation and delivery of associated national policies.

The Code of Federal Regulations of the United States of America Aug 27 2022 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

The Upper Limit Apr 10 2021 Since 1993, crime in the United States has fallen to historic lows, seeming to legitimize the country's mix of welfare reform and mass incarceration. The Upper Limit explains how this unusual mix came about, examining how, beginning in the 1970s, declining living standards for the poor have defined social and penal policy in the United States, making welfare more restrictive and punishment harsher. François Bonnet shows how low-wage work sets the upper limit of social and penal policy, where welfare must be less attractive than low-wage work and criminal life must be less attractive than welfare. In essence, the living standards of the lowest class of workers in a society determine the upper limit for the generosity of welfare and for the humanity of punishment in that society. The Upper Limit explores the local consequences of this punitive adjustment in East New York, a Brooklyn neighborhood where crime fell in the

1990s. Bonnet argues that no meaningful penal reform can happen unless living standards and the minimum wage rise again.

Enlightening and provocative, *The Upper Limit* provides a comprehensive theory of the evolution of social and penal policy.

Applied Corporate Finance Sep 23 2019 Readable and usable in style and valuable in approach, this text provides the practical and succinct advice that students and practitioners need, rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, the author applies corporate finance to real companies. The new Third Edition has four real-world core companies to study and follow. Perfected suited for MBA programs' corporate finance and equity valuation courses, all business decisions are classified into three groups: the investment, financing, and dividend decisions.

Implementing Institutional Controls at Brownfields and Other Contaminated Sites Aug 15 2021 Most brownfields cleanups have relied on institutional and engineering controls as part of the remedy, although the implementation, monitoring, and enforcement of these controls is one of the most difficult issues affecting contaminated property cleanup and redevelopment. The critical role of institutional controls has recently been highlighted by the 2001 Brownfields Amendments, and as a result a key element in the future success of brownfields redevelopment will rest on understanding and effectively using risk-based corrective action, including institutional and engineering controls. *Implementing Institutional Controls at Brownfields and Other Contaminated Sites*, the first book on this important and evolving topic, provides a thorough grounding in the history and current use of institutional controls. Emphasizing federal, state and public perspectives, this compendium of articles written by over 43 experts in the field offers real estate and environmental practitioners a state-of-the-art review of a subject that is integral to

the success and growth of brownfields redevelopment projects. also examines some of the emerging tools that can be used in brownfields redevelopment, including custodial trusts, one-call systems, and web-based tracking systems. It also discusses the benefits of the proposed uniform model law on environmental covenants (UECA). Part II addresses the federal perspective, including the statutory and regulatory framework for the use of institutional controls in CERCLA and RCRA. The state perspective is covered in Part III, looking at the varying use of these controls in several states, including Arizona, California, Illinois, Massachusetts, New Jersey, and Maine. Experience in the Field is the focus of Part IV, which reviews how these controls have been used, highlights recent case studies, and draws conclusions on what can be learned from these successes and failures. documents and forms, including the flow chart from the ASTM Standard Guide on the Use of Activity and Use Limitations, Including Institutional and Engineering Controls (E 2091), final fact sheets from the Environmental Protection Agency for site managers at Superfund and RCRA sites, guidance from the Department of Defense, and state documents referenced in the text.
