The Tempo Indications of Mozart Apr 07 2021 No ancient culture has left us more tantalizing glimpses of its music than that of the Greeks, whose art and literature continually speak to us of the role of music, its power, and its significance to their society. In this book two scholars-one of music and one of classics-join together to explore the musical life of ancient Greece, focusing on the Greek stringed instruments and, in particular, on the all-important lyre family.

Exhibit A Jan 04 2021 Guy Bourdin, who died in 1991, was a legend in the world of fashion photography. He was the most radical and audacious photographer of his generation but his reputation has been surrounded in secrecy - he rarely allowed his photographs to appear outside the pages of French Vogue. No book of his work has previously been published. His estate was frozen by the courts until 1997, after which his son, Samuel, gained control of his work as a result of which this long-awaited book can be published. Bourdin was originally a painter and a friend of Man Ray. His fashion photographs began to incorporate his surrealist influences. Fashion photography became an arena for his personal obsessions. The results are as shocking and astonishing as any commercial photograph ever published. They were executed meticulously. Despite his intense eroticism, subversion and, as Cecil Beaton described, 'his grotesque little gamines', Beaton referred to him in 1975 as 'unquestionably the most interesting fashion photographer in Paris today'. His work was said to have represented 'the look of an era -glamorous, hard-edged, cleverly spiced with vulgarity.. .rich with implied narratives and strong erotic undercurrents'

Computational Intelligence for Privacy and Security Nov 14 2021 The book is a collection of invited papers on Computational Intelligence for Privacy and Security. The majority of the chapters are extended versions of works presented at the special session on Computational Intelligence for Privacy and Security of the International Joint Conference on Neural Networks (IJCNN-2010) held July 2010 in Barcelona, Spain. The book is devoted to Computational Intelligence for Privacy and Security. It provides an overview of the most recent advances on the Computational Intelligence techniques being developed for Privacy and Security. The book will be of interest to researchers in industry and academics and to post-graduate students interested in the latest advances and developments in the field of Computational Intelligence for Privacy and Security.

Programming with Multiple Precision Apr 19 2022 GMP and MPFR are portable libraries for arbitrary precision arithmetic, large set of functions which allows to organize the computational process with different digit capacity. This book is a real guide for writing programs in C/C++ using the GMP and MPFR libraries to improve the accuracy of the solutions, including in parallel programming. The book contains many examples of the program code with its experiments results. It will be interesting for many scientists, programmers and

students, who want to study programming, improve or expand their level programming. The book is useful for graduates in computer science and mathematics (perhaps too specialized for the most of undergraduates, at least in its present state), researchers in Numerical Analysis, Computer Algebra and developers of the multiple-precision libraries.

Why Aug 19 2019 Can drinking coffee help people live longer? What makes a stock's price go up? Why did you get the flu? Causal questions like these arise on a regular basis, but most people likely have not thought deeply about how to answer them. This book helps you think about causality in a structured way: What is a cause, what are causes good for, and what is compelling evidence of causality? Author Samantha Kleinberg shows you how to develop a set of tools for thinking more critically about causes. You'll learn how to question claims, identify causes, make decisions based on causal information, and verify causes through further tests. Whether it's figuring out what data you need, or understanding that the way you collect and prepare data affects the conclusions you can draw from it, *Why* will help you sharpen your causal inference skills.

Introduction to Psalms Jun 21 2022 Hermann Gunkel's commentary on Psalms (Die Psalmen, HKAT)—considered by many to be his magnum opus—was published in 1926. But he was unable to complete his final work on the Psalms. The severe suffering of the final months of his life forced him to hand over his incomplete manuscript, at Christmastime 1931, to his pupil Joachim Begrich. Gunkel died on 11 March 1932. Begrich put the final touches on the organization of Gunkel's last work on Psalms, and it was published in 1933 as *Einleitung in die Psalmen: die Gattungen der religiösen Lyrik Israels*. As with much of Gunkel's other work, the influence of *Einleitung in die Psalmen* on the study of the Psalms, Hebrew poetry, and, indeed, the whole realm of Old Testament literature, lyric, and cult, as already noted, "can scarcely be overestimated."

The Lamberts Jun 28 2020 'Families are societies in miniature.' *The Lamberts*: George, Constant and Kit won a Somerset Maugham Award in 1987. A lesson in the fragility of fame, it tells the tragic story of three generations: George, one of Australia's leading painters; his talented composer-conductor son Constant; and grandson Kit, who managed the pop group The Who. 'Motion's project is not just to tell the story of passing generations, which he does very readably and well, but necessarily also to describe and evaluate aspects of English culture - revivalist painting, classical music in the Twenties and Thirties, the foundation of a native ballet, pop music in the Sixties - which he does with considerable confidence and resource.' London Review of Books 'The story of the three Lamberts is as cruel and horrifying as any Greek tragedy... Its portrayal of the way in which the Lamberts instinctively yet unintentionally assisted in the destruction of their own offspring makes for truly compulsive reading.' Harpers and Queen 'An exemplary piece of research' (Sunday Times). 'A biographical triumph.' Observer

Intelligent Tools for Building a Scientific Information Platform Oct 25 2022 This book is a selection of results obtained within one year of research performed under SYNAT - a nationwide scientific project aiming to create an infrastructure for scientific content storage and sharing for academia, education and open knowledge society in Poland. The selection refers to the research in artificial intelligence, knowledge discovery and data mining, information retrieval and natural language processing, addressing the problems of implementing intelligent tools for building a scientific information platform. The idea of this book is based on the very successful SYNAT Project Conference and the SYNAT Workshop accompanying the 19th International Symposium on Methodologies for Intelligent Systems (ISMIS 2011). The papers included in this book present an overview and insight into such topics as architecture of scientific information platforms, semantic clustering, ontology-based systems, as well as, multimedia data processing.

An Essay on Musical Expression May 08 2021

Mozart's Tempo-System Nov 26 2022 A reference book for the musician's practical work of interpretation, this volume, after a general presentation of 18th century principles for determining a tempo, offers a compendium of all Mozart's autograph tempo markings in 420 lists of pieces of similar character. Thus, a comparison of slower and quicker movements is made possible by 434 music examples, and there follows a wide-ranging collection of relevant texts taken from historical sources. The book does not claim to know "the single correct

tempo" for the works of Wolfgang Amadeus Mozart. It hopes to be of assistance in the unavoidable search by every interpreter for the "true mouvement" of each work—for the work itself, for the performer, the instrument or instruments, the room, the public, the nature of the event. It follows that there can be no absolutely "authentic" tempo for Mozart's works. And yet his tempo markings, since he chose them so meticulously, should be taken equally seriously with the other parameters of his famously precise notation. Alfred Brendel writes: "an astonishing opus ... one of those rare and important books in which music and musicology form a vital association; a lifelong study that makes one very much aware of a field to which attention is rarely paid. It accomplishes this by bringing to bear an understanding that never loses sight of the musical foundation on which it is built, and by a discerning intelligence that does not shy away from raising debatable topics, although without ever claiming infallibility ... One cannot be grateful enough to Helmut Breidenstein for his methodological accuracy which allows us Mozart interpreters to orientate ourselves with ease and pleasure ... His book sharpens our perception, at the same time giving an overview and making us sensitive to each individual case. Admiration and gratitude."

Maestro Oct 21 2019 The tale of young Hannah, who loves above all else to sing. What worse curse could have been visited upon her than this: she has been sent to live with her aunt and uncle in a sorrowful town where music itself is banned from its grim and cobbled streets. What woe has befallen this town? Why are there no children? Why are there no rats? Hannah will discover the answers to these dread questions in the wilderness wastes, under a mountain. There she discovers a secret orchestra, held captive by an ancient conductor, who remembers his glorious youth – when no-one could resist the beauty he could make with his flute. Could our Hannah be the bridge between two ancient enemies? Might the ghosts of the rats come to her aid? And, most importantly, will she sing once again?

The Law of the International Criminal Tribunal for the Former Yugoslavia May 20 2022 This thorough commentary on the International Criminal Tribunal for the Former Yugoslavia draws on legislative history, international and comparative law sources, and the Tribunal's Rules of Procedure and Evidence to analyze its workings, effectiveness, and significance in the development of international criminal law. In addition to its penetrating commentary, the book provides an overview of the conflict of the former Yugoslavia, an article-by-article analysis of the Statute, and annotated texts of the Rules of Procedure, the Rules on Detention, and the Directives for the Assignment of Defence Counsel.

A Manual of Hebrew Poetics Oct 01 2020 "This manual closes a circle which began almost thirty-five years ago (November, 1954) with the beginning of work on a doctoral dissertation defended at the Pontifical Biblical Institute in April, 1957 (published in Spanish in 1962). During three decades of teaching and writing the author has kept an active interest in poetics and stylistics and the resulting accumulated knowledge has been concentrated in the present manual. The primary purpose of the book is not to serve as a source of information about facts and authors but rather to initiate the reader into the stylistic analysis of poetry. To obtain information and to classify it the reader can turn to recent works (Watson), earlier works (Knig, Hempel), or reprinted works (Bullinger). Among the poetic techniques discussed are sound and sonority, rhythm, imagery, figures of speech, dialogue and monologue, development and composition"--Page 4 of cover.

Advances in Knowledge Discovery and Management Jan 16 2022 During the last decade, the French-speaking scientific community developed a very strong research activity in the field of Knowledge Discovery and Management (KDM or EGC for “Extraction et Gestion des Connaissances” in French), which is concerned with, among others, Data Mining, Knowledge Discovery, Business Intelligence, Knowledge Engineering and SemanticWeb. The recent and novel research contributions collected in this book are extended and reworked versions of a selection of the best papers that were originally presented in French at the EGC 2009 Conference held in Strasbourg, France on January 2009. The volume is organized in four parts. Part I includes five papers concerned by various aspects of supervised learning or information retrieval. Part II presents five papers concerned with unsupervised learning issues. Part III includes two papers on data streaming and two on security while in Part IV the last four papers are concerned with ontologies and semantic.

Abstracts in Academic Discourse Nov 02 2020 The book brings together a rich variety of perspectives on abstracts as an academic genre. Drawing on genre analysis and corpus linguistics, the studies collected here combine attention to generic structure with emphasis on language variation and change, thus offering a multi-perspective view on a genre that is becoming one of the most important in present-day research communication. The chapters are organized into three sections, each one offering distinct but sometimes combined perspectives on the exploration of this academic genre. The first section looks at variation across cultures through studies comparing English with Spanish, Italian and German, while also including considerations on variation across genders or the native/non-native divide. The second section centres on variation across disciplines and includes a wide range of studies exploring disciplinary identities and communities, as well as different degrees of centrality in the disciplinary community. The third and final section explores language and genre change by looking at how authorial voice and metadiscourse have changed over the past few decades under the influence of different media and different stakeholders.

Soft Computing Techniques in Vision Science Sep 12 2021 This Special Edited Volume is a unique approach towards Computational solution for the upcoming field of study called Vision Science. From a scientific firmament Optics, Ophthalmology, and Optical Science has surpassed an Odyssey of optimizing configurations of Optical systems, Surveillance Cameras and other Nano optical devices with the metaphor of Nano Science and Technology. Still these systems are falling short of its computational aspect to achieve the pinnacle of human vision system. In this edited volume much attention has been given to address the coupling issues Computational Science and Vision Studies. It is a comprehensive collection of research works addressing various related areas of Vision Science like Visual Perception and Visual system, Cognitive Psychology, Neuroscience, Psychophysics and Ophthalmology, linguistic relativity, color vision etc. This issue carries some latest developments in the form of research articles and presentations. The volume is rich of contents with technical tools for convenient experimentation in Vision Science. There are 18 research papers having significance in an array of application areas. The volume claims to be an effective compendium of computing developments like Frequent Pattern Mining, Genetic Algorithm, Gabor Filter, Support Vector Machine, Region Based Mask Filter, 4D stereo camera systems, Principal Component Analysis etc. The detailed analysis of the papers can immensely benefit to the researchers of this domain. It can be an Endeavour in the pursuit of adding value in the existing stock of knowledge in Vision Science.
